

BHUVAN N

Full Stack Developer

Bangalore, India | +91 9008919355 | bhuvann67@gmail.com
github.com/Bhuvann-dev | linkedin.com/in/bhuvan-n-1aa886425

PROFESSIONAL SUMMARY

Full Stack Developer focused on building and testing practical products, AI-powered automations, AI agents, and internal tools that solve real operational problems. Experienced across React, Next.js, TypeScript, Java/Spring Boot, Node.js, FastAPI, and modern databases, delivering reliable, maintainable, and well-tested applications. My interest in automation began at Technicolor Academy, where I developed VEX scripts and procedural tools to improve production workflows. I am particularly interested in using AI agents to streamline team workflows and create intelligent products. I enjoy understanding problems, identifying opportunities for improvement, and taking ownership of solutions from database design and backend development through testing, deployment, and the final user interface.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frontend: React, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Spring Boot, Node.js, Express.js, FastAPI, REST API Design
AI & Automation: OpenAI API, LLM integration, structured outputs, prompt engineering, AI agents & workflows, Claude Code, workflow automation & internal tooling
Databases: MySQL, PostgreSQL, MongoDB, Cloud Firestore, Drizzle ORM
Tools & Platforms: Git, GitHub, Docker, Redis, Celery, Postman, JUnit, Vercel, Firebase, VS Code
Concepts: OOP, Data Structures & Algorithms, MVC Architecture, Authentication & Authorization (JWT, OAuth 2.0), Database Schema Design, Asynchronous Task Processing, Unit & Integration Testing, Agile/Scrum

EXPERIENCE

- Full Stack Development Program — KodNest, Bangalore**

Dec 2025 – Jun 2026

 - Completed an intensive six-month program in Java and Python full stack development — object-oriented programming, data structures and algorithms, and competitive programming.
 - Built full stack web applications end to end: responsive frontends, Spring Boot REST backends, and relational database design with SQL.
 - Applied a professional development workflow — Git version control, unit and integration testing, debugging, and API testing with Postman.
 - Sharpened problem-solving through regular DSA practice and competitive-programming exercises.
- Freelance 3D/AR Artist — Self-Employed, Bangalore**

Feb 2025 – Nov 2025

 - Delivered 3D asset and AR visualization work for client projects, independently managing scope, revisions, and delivery timelines.
 - Self-studied software engineering in parallel — Java, OOP, data structures, and full stack web development — before formalizing the transition through KodNest.
- 3D Asset Generalist, Technical Art Track — Technicolor Academy, Hyderabad**

Jun 2024 – Jan 2025

 - Built procedural tools and automation in Houdini using VEX scripting, Attribute VOPs, and HeightFields, cutting repetitive asset-creation work for artists.
 - Debugged complex node networks and created reusable, non-destructive workflows within a collaborative production pipeline.
- Junior 3D Quality Assurance Specialist — CharpstAR**

Apr 2024 – Jun 2024

 - Tested augmented reality experiences across devices, reproducing and documenting defects against acceptance criteria prior to client release.
 - Worked directly with the development team through iterative review cycles to verify fixes, contributing to the successful launch of multiple client AR projects.

PROJECTS

- ResumeIQ — AI Resume Analyzer**

github.com/Bhuvann-dev/ResumeIQ

Next.js, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, Redis, Celery, OpenAI API, S3

 - Built a full stack application that scores resumes against ATS criteria and returns targeted rewrite feedback, using OpenAI structured outputs for consistent, parseable results.

- Designed an asynchronous processing pipeline with Celery workers and Redis as broker, so long-running LLM calls never block the request cycle.
- Implemented Google OAuth 2.0 with JWT sessions, and automatic deletion of uploaded resumes from object storage to limit retention of personal data.

PG Manager — Rent & Tenant Management Platform

[Live · GitHub](#)

Next.js 16, React 19, Tailwind CSS v4, Firebase Auth, Cloud Firestore, Firebase Storage

- Built a property management platform for paying-guest and hostel owners covering rooms, bed capacity, tenants, and rent collection.
- Enforced multi-owner data isolation through Firestore security rules, so each owner can access only their own records.
- Implemented a per-tenant rent ledger with payment history, bulk tenant import from Excel via the xlsx library, and automated WhatsApp reminders for overdue rent.

Soil Heritage Hub — Coffee Farmer Marketplace

github.com/Bhuvann-dev/soil-heritage-hub

React, Vite, Tailwind CSS, Node.js, Express, PostgreSQL, Drizzle ORM

- Built a marketplace connecting coffee farmers directly with consumers, featuring product browsing by region and a farmer directory.
- Developed REST endpoints for products, farmers, regional data, order creation, and partner applications, with a relational schema modeled in Drizzle ORM and TypeScript types shared across client and server.

GitHub Code Review Agent

in progress

TypeScript, Node.js, LLM/AI

- Building an AI-assisted CLI that accepts a public GitHub pull request URL, reads the changed TypeScript files, and returns structured, evidence-based findings to speed up review.
- Designed a pre-registered fixture set of public pull requests with per-finding ground-truth verdicts, so review precision is measured honestly rather than tuned against the tool's output.

BuildHub — Beginner-Friendly Project Teams

frontend prototype

HTML5, CSS3, JavaScript

- Designed and built the frontend for a platform that helps newcomers find approachable projects to join, meet teammates, and turn small contributions into a shareable portfolio.

EDUCATION

B.Sc. in Computer Science

2021 – 2024

Reva University, Bangalore

Pre-University College

2019 – 2021

Alva's PU College, Vidyagiri

CERTIFICATIONS

- Full Stack Web Development — KodNest, 2026
- AI Foundations, Applied AI Foundations & Agents and Workflows — OpenAI Academy, 2026
- Claude Code in Action & Introduction to Claude Cowork — Anthropic, 2026
- 3D Asset Generalist — Technicolor Academy, January 2025

ACHIEVEMENTS & LANGUAGES

Achievement: Co-published a research paper on application UI/UX design, indexed on Google Scholar.

Languages: English, Kannada, Telugu, Hindi
